

Subham Ray

Full Stack Developer | Generative AI Enthusiast

subhamray865@gmail.com | +91 7439563461 | GitHub | LinkedIn

Professional Summary

Computer Science undergraduate with hands-on experience building full stack web applications, AI powered platforms, and scalable backend systems. Skilled in React.js, Node.js, Express.js, MongoDB, Docker, and modern web development practices. Experienced in integrating Large Language Models (LLMs), LangChain workflows, Retrieval-Augmented Generation (RAG), and real-time communication systems into production-ready applications.

Technical Skills

Languages: JavaScript, TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, SCSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Pinecone Vector Database

GenAI: LangChain, LLM Integration, Prompt Engineering, RAG, AI Agents, Vector Search

DevOps and Cloud: Docker, Kubernetes, Git, GitHub, AWS (Basics)

Projects

SupportDesk : Multi-Tenant AI Customer Support Platform

React.js, Node.js, Express.js, MongoDB, Pinecone, Mistral AI, LangChain

- Engineered a multi tenant AI powered customer support platform enabling organizations to deploy embeddable chat widgets across websites.
- Implemented Retrieval Augmented Generation (RAG) using Pinecone Vector Database and Mistral LLM to provide knowledge-grounded responses.
- Developed AI driven ticket routing workflows with automatic escalation to human agents when confidence thresholds were not met.
- Designed tenant isolated architecture supporting role based access control, API integrations, and knowledge base management.
- Built scalable REST APIs, authentication workflows, document ingestion pipelines, and admin dashboards.

Perplexity : AI Powered Real Time Chat Application

React.js, Node.js, MongoDB, Socket.IO, LangChain, Gemini, Mistral

- Developed a full stack AI chat platform supporting multiple Large Language Models through LangChain orchestration.
- Integrated Socket.IO for real-time messaging and streaming AI responses.
- Implemented search-augmented generation workflows using Tavily Search API to enrich model responses with web context.
- Built secure JWT based authentication, persistent chat history, and multi-session conversation management.
- Designed scalable backend services for AI inference, search augmentation, and real time communication.

Experience

Frontend Developer Intern (Remote)

AskMeIdentity

Duration: 3 Months

- Contributed to the development and enhancement of production-grade user-facing features, improving usability and overall user experience.
- Developed scalable and reusable React.js components following modern frontend engineering practices.
- Collaborated with product managers and designers to transform design specifications into responsive, pixel-perfect interfaces.
- Optimized frontend responsiveness and maintainability through component-driven development practices.
- Participated in debugging, feature iterations, and code reviews while maintaining clean and maintainable code standards.

Education

Academy of Technology (AOT)

2024 – 2028

Bachelor of Technology (B.Tech), Computer Science and Engineering
